

Peace Bridge: Fort Erie, Ontario, Canada to Buffalo, NY 2002

Service

To provide a drain system that will reduce weight, be non-corrosive to salt, water, oil and fuel. Departments of Transportation in both the United States and Canada have selected the fiberglass bridge drain product.

Features & Benefits

The light-weight pipe was pushed & pulled through the supports, which saved “in-air” assembly labor and risk.

Pipe Systems

Fiberglass Bridge drain pipe, scuppers and clean-outs. The pipe was pigmented throughout “Peace Bridge Green”. There were zero leaks in the system.

- 3,000’ 12”, 14”, 18”. Also 6” -10”
- Scuppers, clean-outs and fittings
